SUMMARY

Full-Stack Developer with 3+ years of experience shipping production web applications end-to-end – from architecture and API design to deployment and performance tuning. Track record of measurable impact: cut server response times, reduced manual workflows by up to 60%, and shipped solo-owned platforms serving real users. Core stack: React.js, Next.js, Node.js, TypeScript, and AWS.

EXPERIENCE

Pardy Panda Studios

Full-Stack Developer

Feb. 2023 – Present

Vadodara, India

- Promoted from Software Development Intern to Full-Stack Developer within 3 months – one of the fastest track records on the team, driven by delivery quality and technical ownership
- Owned end-to-end delivery of multiple client projects, driving technical architecture decisions across the full stack (React.js, Next.js, Node.js, TypeScript, Strapi CMS)
- Re-engineered a core backend system through MongoDB indexing and query restructuring, cutting server response time by 15% and boosting API throughput by 20%
- Scaled Strapi CMS adoption across 3+ client engagements, eliminating developer bottlenecks and giving non-technical teams full content autonomy
- Shipped 2 production marketing sites (Halalify, Skylon Engineering) that directly improved client conversion and online presence

PROJECTS

Aasha | Next.js, React.js, TypeScript, Tailwind CSS, Axios, React Query

2025 – 2026

- Built and deployed a 5-module employer management platform solo – cutting hiring workflow time by 40%
- Standardized API integration via a reusable adapter/proxy layer over Swagger-documented APIs
- Established security architecture with session-based auth, CSRF protection, and middleware route guards

Storibble | Node.js, TypeScript, Express.js, MongoDB, AWS EC2

2024 – 2025

- Developed backend features for a social storytelling mobile app – deep link generation, Admin Panel APIs with RBAC, and Firebase FCM push notifications
- Maintained a dual-versioned API codebase (v1 + v2) on AWS EC2 with PM2 and Prometheus, ensuring zero-downtime deployments and continuous uptime monitoring

Raas | Node.js, TypeScript, Medusa v2, PostgreSQL, Redis, Docker, GitLab CI/CD

2025

- Integrated key backend features into a production e-commerce platform for the UAE market – custom order rejection with partial refund workflows via Stripe, invoice PDF generation, real-time admin notifications via SSE, OTP authentication, Redis caching, and Meilisearch search integration, delivered within a Dockerized GitLab CI/CD pipeline

KD International | Next.js, TypeScript, Tailwind CSS, Strapi, MySQL

2023

- Architected and launched a TDS document processing system as the sole developer, automating the full approval and email delivery workflow and eliminating 60% of manual admin work

Surgiyo | Node.js, React.js, Tailwind CSS, Firebase, MongoDB, GCP

2023 – 2024

- Engineered a medical video management platform with an admin portal built on React.js and a Node.js backend, enabling healthcare professionals to reliably process and access large-scale video content (100MB+ files) via Google Cloud Functions and the Video Transcoder API
