SUMMARY

Full-Stack Developer with 3+ years of experience building scalable web applications, REST APIs, and production-grade backend systems using **React.js, Next.js, Node.js, TypeScript, and AWS**. Experienced in taking projects from architecture and API design through to deployment and performance optimization. Passionate about clean code, intuitive UI/UX, and reliable products.

EXPERIENCE

Pardy Panda Studios

Feb. 2023 – Present

Full-Stack Developer

Vadodara, India

- Joined as a **Software Development Intern** and promoted to **Full-Stack Developer** within 3 months, based on performance and project delivery
- Independently worked on multiple client projects using **React.js, Next.js, Node.js, TypeScript, and Strapi CMS**, owning architecture, development, and deployment from start to finish
- Refactored backend codebase to eliminate redundant logic, achieving a **15% reduction in server response time** and **20% improvement in API performance**
- Embedded Strapi CMS across **3+ engagements**, enabling non-technical teams to manage content independently and reducing developer dependency for routine updates
- Launched **2 marketing websites** (Halalify, Skylon Engineering) using Webflow, improving client online presence and conversion rates

SKILLS

Frontend : HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Material UI, Webflow

Backend : Node.js, Express.js, Strapi.js, Medusa v2, REST API Design, JWT, Role-Based Access Control

Database : MongoDB, MySQL, PostgreSQL, Redis

Cloud & Tools : AWS EC2, AWS Lightsail, GCP Cloud Functions, Cloudinary, Firebase FCM, Cloudflare Workers, Docker, GitLab CI/CD, PM2, Git, Postman

PROJECTS

Aasha | Next.js, React.js, TypeScript, Tailwind CSS, Axios, React Query

2025 – 2026

- Built a **5-module employer management portal** (Dashboard, Jobs, Candidates, Connectors, Account Settings) from scratch as sole developer, reducing hiring workflow steps by **40%**
- Integrated Swagger-documented APIs via a reusable adapter/proxy layer, cutting API integration time and standardizing request handling across the application
- Implemented complete auth system with session cookies, CSRF token handling, middleware route guards, and login, logout, and password recovery flows

Storibbble | Node.js, TypeScript, Express.js, MongoDB, AWS EC2

2024 – 2025

- Implemented backend features for a social storytelling mobile app including **deep link generation**, Admin Panel APIs with role-based access control, and **Firebase FCM** push notifications
- Worked within a dual-versioned API codebase (v1 + v2) on **AWS EC2** with PM2 and Prometheus, ensuring **zero downtime** across all deployments

Raas | Node.js, TypeScript, Medusa v2, PostgreSQL, Redis, Docker, GitLab CI/CD

2025

- Engineered key backend features for a **full-stack fashion e-commerce platform** for the UAE market, implementing custom order rejection with **partial refund workflows** via Stripe, and invoice PDF generation using Puppeteer and Handlebars.js
- Built **real-time admin notifications** via SSE, phone-based OTP authentication, push notifications (FCM), and Meilisearch product search integration within a Dockerized GitLab CI/CD pipeline

KD International | Next.js, TypeScript, Tailwind CSS, Strapi.js, MySQL

2023

- Architected and deployed a **TDS document processing system** with Next.js frontend and Strapi CMS backend, reducing manual admin effort by **60%** through automated approval and email delivery workflows

Surgijo | Node.js, React.js, Tailwind CSS, Firebase, MongoDB, GCP

2023 – 2024

- Built a **medical video processing system** using Google Cloud Functions and Video Transcoder API for handling **100MB+ files**, with a React.js admin portal and Webflow marketing site

EDUCATION

Parul University

2019 – 2023

Bachelor of Technology in Computer Science (**CGPA: 7.65**)

Vadodara, India
